Yes, that's a number, but what does it mean?

A teal-colored diagonal graphic element consisting of two overlapping triangles, one pointing towards the top-right and one pointing towards the bottom-right, located in the upper right corner of the slide.

INTEGERS.

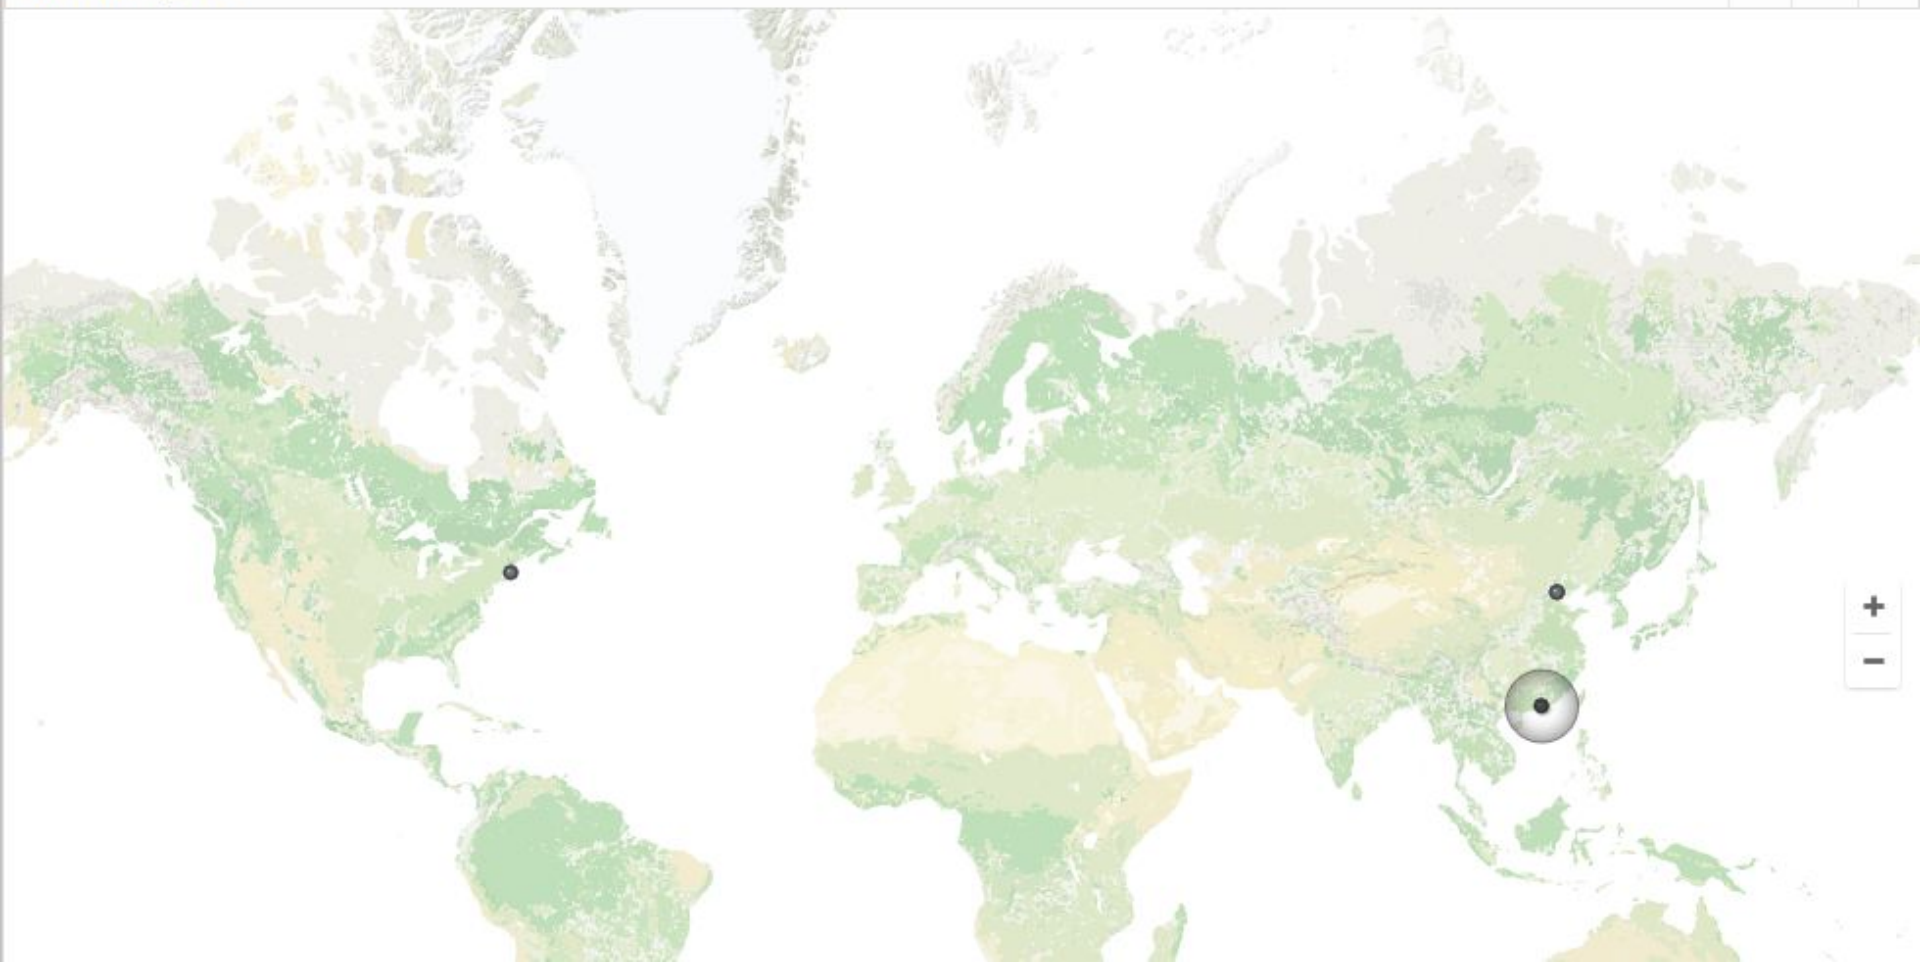

**WHAT ARE
THEY GOOD
FOR?**

Quick poll

How many FTE do you have dedicated to bot detection and filtering?

How many FTE could you commit to this activity?

What we really need*

Accuracy

Numbers that reflect actual human, intellectual usage. Well, and some bots.

Comparability

Our numbers actually make sense when compared.

Standards

COUNTER PIRUS, OAS, Knowledge Exchange, etc.

* Daniel Beucke, SUB Göttingen

354 views?

Otherwise, we are just giving

1,244 downloads?

our community

12,543 readers?

'feel good' integers, not actual impact.

Do we need a
CANADIAN
standard?
YES, PLEASE.

Google Analytics

IS NOT THE ANSWER.

*cf. 10.1080/01930826.2016.1216224 -
or u.mcmaster.ca/irstats*

IRUS-UK

How it works

Aggregate IR usage data centrally

Apply common filters to all

Issue COUNTER-compliant statistics

Caveat

All using DSpace or Eprints, i.e.- open source, IR software

THANK YOU!

No integers were
actually harmed in the
creation of this slide
deck.
